

DTC Center head participates as guest speaker for PCU tech-related Webinar Series

The Philippine Christian University, through the Masters in Information Technology class under the Graduate School of Business Management, conducted a webinar series tackling Technology Project Management and Methods, Tools and Techniques of Data Analytics. The online training series was held every Saturday in March and April.

BatStateU Center Head for the Digital Transformation Center Dr. Alvin S. Alon was among the invited speakers for the training series. He provided a technical discussion on the "Introduction to Data Analytics Tools" via Zoom Online Platform on March 13.

PARROT: Internship Program for BatStateU CICS Students

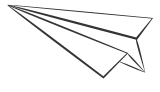

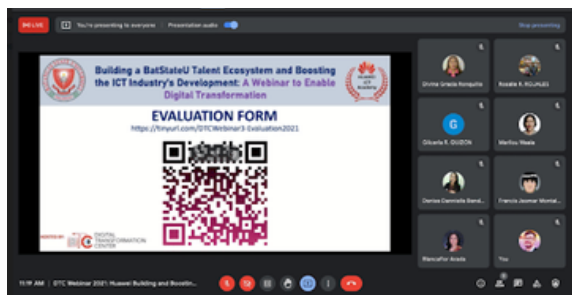

DTC Center Head Dr. Alvin S. Alon conducted an immersion program which started on June 14 with CICS entitled, "PARROT: PublishAble Research WRiting COLlaboraTion Program."

This immersion program aims to provide opportunities for students to practice their skills and learn emerging technologies and provide relevant IT industry experience while assisting various research projects of the center.

The program required student participants to perform specific tasks to help them function effectively in teams to accomplish common goals such as report writing and preparation of necessary paperwork.

Throughout 2021, DTC continues to become instrumental in advancing ICT innovations in the use of Internet-of-Things (IoT), Data Science, and many other emerging ICT facets that benefit the community.
