

Hands-on Training for Calibrators

This year, hands-on training for Material Testing & Calibration Center calibrators was conducted together with representatives from Chromar Unitrade Inc., Engr. Kevin Lumtao and Sir Allen Rodales. MTCC uses three calibration principles: electrical calibration, pressure calibration, and temperature calibration.

MTCC Metrology and Calibration Training Webinar

The MTCC Metrology and Calibration Training Webinar themed, "Embracing the Future of Metrology and Calibration in the Pursuit of Technological Innovation" was conducted online in September this year.

The webinar was joined by BatStateU faculty, staff, and students. The four-day online event was led by Dr. Reymark Maalihan, Head of MTCC, featuring guest speaker Engr. Kevin Roy Lumtao. The webinar covers general metrology, electrical calibration, pressure calibration, and temperature calibration.

Updates on calibration section of MTCC

On May 28, the Initial installation and placement of equipment in the calibration Section of MTCC was conducted.

The items which were installed by Chromar Unitrade Inc. were the multiproduct calibrator, oscilloscope, deep-well compact for temperature calibration, IR calibrator, water deadweight tester, and hydraulic calibrator.
