

Webinar on Innovations in Analytical Chemistry Instrumentation and Analysis

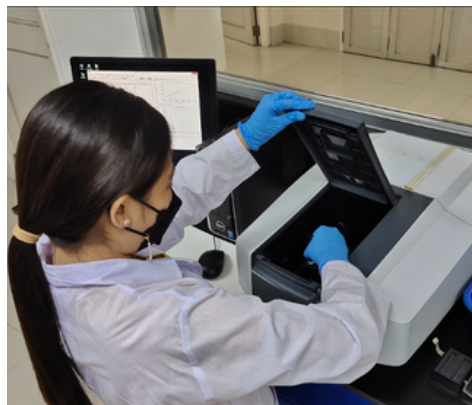

A webinar spearheaded by the Analytical Research Center as part of the Innovation Month Celebration.

The online event was attended by students and faculty from BS Chemistry, BS Chemical Engineering, and BS Food Engineering. The resource speaker Ms. Lyka Monserrat, Application Chemist from Shimadzu Philippines, Inc., tackled Innovative Solutions on Residual Pesticide Monitoring featuring the Analytical Instruments for Food Safety such as HPLC and GCMS.

ARC Lab Operations

This year, the ARC laboratory continuously provides analytical services to students conducting synthesis and experimentation part of their thesis.

Facilities and Equipment
