

## International Virtual Symposium on Environmental and Green Chemistry for Sustainable Development

The International Virtual Symposium on Environmental and Green Chemistry for Sustainable Development (EnvChem2021) was held on June 9, 2021. The event was organized by the Universiti Teknologi MARA (UiTM) in Malaysia, in collaboration with the Batangas State University, Sepuluh Nopember Institute of Technology in Indonesia, and the University of the Philippines Diliman.

With the theme "University-Industry Synergy Towards Sustainable Development," the EnvChem2021 served as a platform for international researchers, industries, and students to share the latest research findings related to environmental and green chemistry sustainability. It also sought to foster an interdisciplinary discussion and networking to further enhance and enrich participants' knowledge in an environment and green chemistry.

## Online Research Colloquia 2021

A total of six research colloquia was held in 2021 via online platforms through the facilitation of the Research Office. The events were held on April 23 and 26, May 3, July 13, November 29, and December 27 via online platform.

## Research Bootcamps 2021

The Research Office spearheaded research boot camps on February 3, 2021, at the AVR, 4th flr., STEERHUB building in BatStateU Alangilan, and August 25, 2021, via Zoom Online Platform.

The event trained the faculty researchers with ongoing research projects on the policies and guidelines in the project implementation.
