## NARRATIVE REPORT

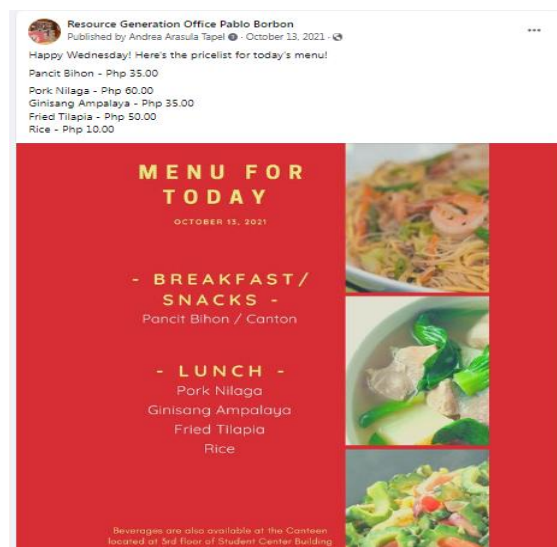

### ROLLING MENU – UNIVERSITY CANTEEN 2021

Batangas State University – The National Engineering University ought to provide its students and faculty an affordable and sustainable food choices inside the campus. The university considered various factors in coming into this conclusion. Students tend to be food insecure which leads to lack of access to nutritious and affordable food.

As a top university, the Batstate-U implemented rolling menu which intends to provide the university and its people the most appropriate menu at the time. It also saves time to have rolling menus and planning it in advance both for the employees and the perceived customers. It provides transparency on the menu and promote healthier choices.

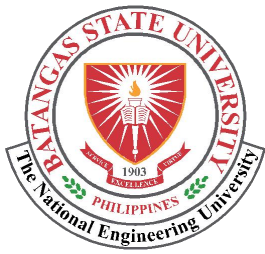

Attached below are the menus posted on the Facebook page of the RGO Pablo Borbon.

**NARRATIVE REPORT KA FRED**  
**“Fred Baluyot”**  
**2021**

Batangas State University—The National Engineering University—Pablo Borbon Campus continuously provides good service to its constituents. One of them is making sure that the employees, faculty, and most importantly, their students, have access to healthier food choices. With these ideals, the university, together with the Resource Generation Office, has catered to different food providers to help them hand in hand in providing healthy food choices. Moreover, the nutritional needs of the students, faculty, and employees go beyond the meals that the university canteen offers, and to satisfy this need, Mr. Fred Baluyot, a long-time fruit seller for the university, is at your service.

Mr. Fred Baluyot, mostly known as "Ka-Fred", has been selling fresh fruits to the students of the university for over a decade. Apples, oranges, and longans are some of the wide variety of fruits that he sells. Ka-Fred makes sure that all of his products have been personally picked and purchased in Manila. Fruits are scientifically proven to provide different vitamins and minerals that employees, faculty, and students need in their day of hectic workload and academics.

As the world continues to adapt to the changes brought by the pandemic, the health of the people has been the constant worry of the government. And, in addition to providing quality service, the university has made health a top priority, providing nutritious, healthy, and sustainable food options not only to its employees and faculty but also to its students. And Ka-Fred, with his fruits, helps the university achieve it.

**NARRATIVE REPORT**  
**RGO Cook 2021**

Batangas State University – The NEU oversees the importance of providing quality and affordable food for its people. It ensures that all the foods that will be served are on top of its quality. Moreover, the university promotes the development of healthy and affordable food choices.

In accordance with this, the Resource Generation Office which facilitates the RGO kitchen guarantees that the proper kitchen etiquette will be implemented. The RGO also conducts menu planning to further enhance it and keep up with the demand.
