

***BatStateU Collaborates with Batangas City Government to Elevate Community Healthcare***

Batangas State University has taken a significant step towards empowering its BS Nursing students to provide top-tier healthcare support to local communities. In July 2022, a partnership was forged between the university and the Batangas City government, marking an important moment in the journey of these aspiring healthcare professionals. The primary objective of this collaboration is not only to enrich their skills and competency but also to immerse them in real-world community healthcare settings.

This other partnership with the LGU goes beyond theory and classroom learning. It's about students gaining hands-on experience in the heart of communities, where their skills and knowledge can make a tangible impact. The agreement encompasses a range of activities designed to impart practical insights and transform these budding nurses into community-oriented healthcare providers.

Initially, students were deployed to serve in Barangays Cuta, Malitam, and Wawa, located in Batangas City. These communities, situated along the banks of the Calumpang River, presented unique challenges and opportunities for the nursing students to engage with a diverse and highly populated environment.

To ensure the success of this partnership, a faculty coordinator appointed by the college's dean assumed the responsibility of monitoring and evaluating the progress of the collaboration. This oversight guarantees that the students receive the guidance and support needed to excel in their healthcare endeavors.

The partnership, scheduled to run until July 2024, promises to be a transformative experience for both the students and the communities they serve. As these nursing students become integral parts of local healthcare initiatives, they contribute to the betterment of community health while acquiring essential skills and expertise that will shape their future as compassionate and competent healthcare professionals.
