

14.4.2. Batangas State University – The National Engineering University has an action plan in place to reduce plastic waste on campus.

Our University through our Center for Sustainable Development has an action plan in place to reduce plastic waste on campus. As mentioned in the University's Sustainable Plan under D.1 On Environment the goal is to reduce gas emissions of the campuses of the University to 25% below the 2022 levels by 2029. More specifically on a 5% decrease of solid waste.

In addition, as mentioned in the University's Policy Guidelines for Sustainable Development under Chapter 1 - Environmental Sustainability, subsection 1.7. Minimization of the Use of Plastic and Disposable Items has a specific policy on the following: use, sale, and entry of "unnecessary single-use plastics" including single-use plastic water bottles, laminated paper products as food containers, paper cups, and paper plates and sachet packaging are prohibited in all activities on all campuses.
