

Highlights

- **Healthy and Affordable Food Accessibility in the University Canteen.**
- **Adhere to the Policy and Guidelines to Ensure Affordable Food Choices.**

ADHERE TO THE POLICY & GUIDELINE AND ENSURE THAT FOOD IS AFFORDABLE

✓ The food offered by the university canteen is the result of the criteria policy that the RGO has implemented, such as "having a healthy and affordable choice of food."

IN SUMMARY, THE UNIVERSITY CANTEEN PROVIDES FOOD WITH ESSENTIAL NUTRITION SUCH AS MACRONUTRIENTS, MICRONUTRIENTS, AND ADEQUATE CALORIES.

HEALTHY & AFFORDABLE IN CAMPUS

HEALTHY FOODS IN THE UNIVERSITY CANTEEN

The University canteen provides healthy and affordable food choices in campus that can be seen on each food stalls menu board. The RGO ensure that rolling menu has a vegan option and dishes. Moreover, the university also encourage healthy beverages and snacks as well as fresh fruits.

FRESH FRUIT SOLD IN THE UNIVERSITY CAMPUS

One of the departments at Batangas State University- The National University - Pablo Borbon that serves the needs of faculty, staff, and students is the Resource Generation Office. Additionally, the office manages facilities like the University Canteen, which means that the office is responsible for the canteen's operations. When there are concerns, problems, and suggestions, staff and students may relay it to the resource generation office.

The Resource Generation Office has published an advisory in relation to the canteen operation, stating that the university canteen offers items that the constituents can access that are both healthy and reasonably priced. They made sure that every food that is served is freshly cooked and safe for the staff and students to consume without spending a lot. An advisory has been published in many university bulletins to make sure that everyone is aware and informed.

Tenant Rolling Menu 2022

The Batangas State University - The National Engineering University ensures that the students and the faculty will be provided with nutritious and affordable food choices inside the campus. Food insecurity has been a problem among students over the years due to the lack of access to healthy and reasonably priced food items. Thus, in conjunction with the RGO Pablo Borbon the BatStateU-TNEU implements a rolling menu in consideration of the health and financial capability of their students.

A rolling menu aims to provide a transparent list of menu items that the consumers can choose from. This menu guarantees menu variety as it offers fruits, snacks, and beverages, as well as full meals including milled rice, vegetables, and meat dishes. These range of options on the menu increases the likelihood of dining in the canteen where food is prepared and served in compliance with the food safety regulations of the university. Moreover, this ensures that the student and the faculty have access to healthy meals everyday. The pricing of food items may differ for each stall of the tenants, yet it still falls on a reasonable price range.

The figures shown below are the menus currently in use by the university canteen tenants of the RGO Pablo Borbon.
