

BATANGAS STATE UNIVERSITY

The National Engineering University

UNIVERSITY GREEN SPACES

FY 2022

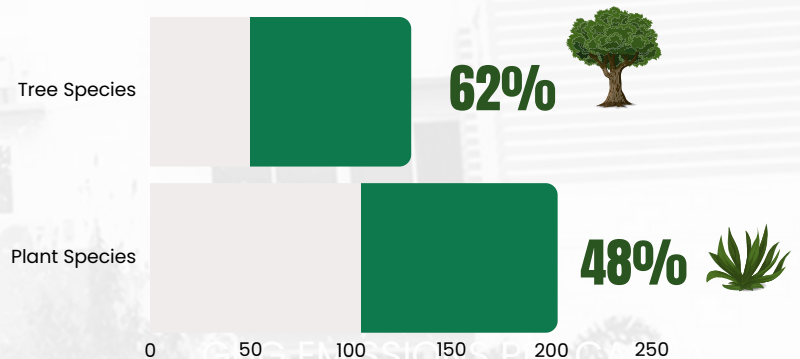

Proportion of Green Spaces in the University Land Area

University's largest campuses are situated in the urban landscape of Batangas. To complement the city's dynamic energy, the University designates substantial portions of its campus grounds to lush greenery, featuring a diverse array of native plant gardens, verdant lawns, and forests with drought-resistant trees.

Proportion of Drought Tolerant Trees and Plants

As of 2022, a total of 80 tree species out of 130 and a total of 98 plant species out of 203 planted across the university campuses are native and drought-tolerant trees and plant.
