

14.5.5. Batangas State University – The National Engineering has implemented a watershed management strategy based on location specific diversity of aquatic species.

The University through our Environmental Management Unit has implemented a watershed management strategy through our Policy and Guideline on Waste Management System dated March 29, 2021, and still being used to present. Under section 5.2. Wastewater Management includes strategies for monitoring, collection, treatment, and disposal of wastewater. Later on, this will imply the protection and conservation of adjacent watersheds and their aquatic organisms.
