BatStateU Supports Sustainably-Sourced Food for its Campuses

The Batangas State University, The National Engineering University ensures food that will be served in every canteen in its eleven campuses are sourced sustainably. As stipulated in the University's Policy Guidelines for Sustainable Development, food is available, adequate, accessible, affordable, clean, safe, healthy, and nutritious within the campus. Those food must come from sustainable sources before being distributed to its food pantries, feeding programs, and livelihood programs. Moreover, the University must also comply with the standards of food services upon choosing its suppliers.
