CLEAN ENERGY THAT MOVES PEOPLE: BATSTATEU AND SUNETRIKE PARTNERSHIP

Mr. Allan Gray, Director of Product Development, discussed the SunErike at BatStateU

The BatStateU TNEU under "**BatStateU CTI Incubation Program**", The BatStateU TNEU has established a technology business incubator under Center for Technopreneurship and Innovation (CTI) which aims to strengthen and commercialization research and development, build an entrepreneurial ecosystem, and develop technology-based startups as an investment for nation-building. houses tech-enabled startups to develop businesses at an early stage and provide incubatee an array of support and services.

The Incubatee, recognize the benefits of acquiring business incubation support from BatStateU TNEU to harness skills and innovative ideas, bring them to market, and minimize risks involved during the first step of establishing a business. The BatStateU TNEU and Incubatee desire to work together and enter into this Memorandum of Agreement for the purpose of admitting the Incubatee into the "BatStateU CTI Incubation Program" and to mutually agree on the terms and conditions of such admission.

Through the BatStateU CTI Incubation Program, a memorandum of agreement was sealed between the University and **SunEtrike**. SunEtrike, also known as sunE, is an electric tricycle system & network that moves riders around the Philippines in a more clean, comfortable, and cost effective way. SunEtrike was founded to reduce street-level pollution by providing a cost-effective alternative for drivers and a profitable investment opportunity in an emerging industry with a great user experience. Sun Etrike is a sustainable transportation solution. Its electric powertrain reduces carbon emissions and improves air quality. By choosing Sun Etrike, passengers can contribute to a greener future, while drivers can enjoy lower operating costs and increased earnings.
