BATSTATEU PROGRAM OFFERING

College of Agriculture and Forestry

The College of Agriculture and Forestry is the only agricultural and forestry school in Batangas province, and produces licensed agriculturists and foresters who make their distinct mark locally and abroad. With its strong pool of faculty experts, the college is also producers of valuable research on agroecosystems and natural resources conservation.

Bachelor of Science in Agriculture Major in Crop Science Bachelor of Science in Agriculture Major in Animal Science

The BSA program aims to educate students in the scientific habit of thought and entrepreneurial skills and prepare them to become globally competitive professionals with entry-level competencies in technical agriculture. It emphasizes the processes and techniques of identifying, diagnosing and analyzing problems and in designing, packaging and applying technologies needed in the development and conservation of the agriculture and food system resources.

Bachelor of Science in Forestry

The graduates of BS Forestry program should be able to practice the profession with competence and integrity in promoting sustainable management of forest resources and ecosystem services and conservation of soil, water and biodiversity.

Bachelor of Science in Forestry

The BS Biology program is a 4- year degree program that is structured as a generalized framework of study with the end view of grounding students with the fundamental concepts, principles and theories of the biological, natural and physical sciences and the conduct of research.

BIODIVERSITY AWARENESS PROGRAM

The International Day of the Forest is celebrated every year on March 21st to raise awareness about the importance of forests and trees. The theme for 2023 is "Healthy forests for healthy people". The simple events on this day help to promote the preservation, restoration, and sustainable management of forests around the world and commemoration of late Dr. Anacleto M. Caringal (AMC) for his contributions in BS Forestry, research and extension of BatStateU Lobo. Through these activities, our students can learn about the benefits of trees, the impact of deforestation, and sustainable forest management practices. We hope that these activities inspire our students to take action to protect our forests and ensure their sustainability for future generations.
